-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Amendment

1. This Office action is responsive to applicant's amendment filed March 14, 2006. Claims 1-15, 21-26, 29-34, 37-42 and 45-56 are pending.

Terminal Disclaimer

2. The terminal disclaimer filed on March 14, 2006 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of U.S. Patent 6,995,856 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Art Unit: 2625

4. Claims 1-15, 21-26, 29-34, 37-42 and 45-56 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-5, 7-11, 13-17, 25, 26, 28, 29, 31, 32, 37, 38, 40, 41, 43, 44, 49, 50, 52, 53, 55, 56, 61-65, 67-72 and 74 of copending Application No. 10/767,765. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims differ only in the manner in which information is set into the mail message of the e-mail address of the user. In the current application, the information is entered by the user by means of a panel, while in the copending application, the information is selected from information previously stored in a memory. Entry of information is a well-known alternative to accessing the same information stored in a memory, and it would have been obvious to one of ordinary skill in the art that the entry of such information using the panel would be necessary in the event that the information had not been previously stored, prior to the transmission of image data by the image data communication apparatus. Therefore, such entry would have been an obvious modification of the selection of stored information as recited in the copending application.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Conclusion

5. The above double patenting rejection was not necessitated by amendment. This double patenting rejection should have been made in the prior Office action, but was inadvertently overlooked. Therefore, this Office action is non-final.
